

# JOB DESCRIPTION – SUPPLY CHAIN ANALYST

23-11-2020

## 1. ABOUT SIM

Supply Chain Information Management (SIM) is a dynamic company with the aim to support its customers to map, visualize and understand the sustainability risks in their supply chains. SIM is a service-oriented knowledge provider with a secure and collaborative software tool. SIM ensures that its customers know where their products come from, under which conditions they are produced and what the ingredients or components of their products are. SIM helps its customers to manage their supply chain risks in real-time and improve issues related to product safety, quality, social compliance and environmental risks. SIM's Customers are large companies like Ahold, Jumbo, Detailresult Groep, and Superunie. We support customers who want to make a difference in their supply chain with their buying power in a cost effective way.

SIM is a fast growing company and is seeking motivated candidates to join their team, in order to support our customers and their suppliers:

## 2. SUPPLY CHAIN ANALYST (SCA) (36-40 HOURS)

As a Supply Chain Analyst you are part of a motivated team which is responsible for mapping and analyzing of the risks in supply chains of SIM's clients. It is your role to request documentation from suppliers in the areas of product and food safety, quality, social compliance, and sustainability. When the requested documentation is received, you process and validate the documentation according to agreed workflows. You work efficiently and process data with high quality within the SIM software tool. As part of this role you think together with the team and share your ideas about business processes and how SIM can help companies make their supply chain transparent and sustainable in a cost-effective way.

## 3. YOUR PROFILE

- You are motivated and customer-oriented
- You have a Can Do Attitude
- You have strong communication skills
- You are a team player, but can also work independently
- You are analytical and have attention for details
- You enjoy working with data and transforming it into relevant information
- You know how to ask the right questions and have a critical look to find the appropriate answers
- You would like to make a difference with the work you do, to have a positive impact and you want to have fun while doing it.

## 4. THE REQUIREMENTS

- Preferably Bachelors degree (HBO)
- Affinity and/or experience with sustainability and food safety, and willingness to educate yourself further in this field of expertise
- Excellent understanding of Dutch and English languages, proficiency in Czech, German, French, Italian and/or Spanish language is a big advantage
- Good computer skills and office software skills (Microsoft Excel)
- You are living in Noord-Holland (or willing to move)
- You can provide your own transportation to our office in Alkmaar

## 5. WHAT WE OFFER

- A position that enables self-initiative and ownership
- A great place to work with motivated, professional and enthusiastic colleagues
- Attention for professional growth through continuous coaching and training
- Possibilities to grow within a company that is growing
- A market conform salary
- Pension plan
- 25 vacation days a year
- SIM is a company that values diversity, equity and inclusion.

## PROCEDURE

If you recognize yourself in this job description, please do not hesitate to send your CV and motivation letter to [vacatures@simsupplychain.com](mailto:vacatures@simsupplychain.com). Depending on the initial match, we will invite you for an interview at our office in Alkmaar.
